## CROSS

Jade Special Metals is one of the finest distinguished exporters and traders of Equal & Reducing Cross Pipe Fittings, which are essential constituents when it comes to strapping joining. Stainless Steel Equal Cross Pipe Fittings is a cold drawn annealed steel of moderately elevated hardenability by means of its chromium content that offers excellent hardness infiltration, and the molybdenum conveys consistency of hardness and soaring strength. Carbon Steel Reducing Cross Pipe Fittings responds quite well to heat-treatment and is comparatively trouble-free to machine in the annealed situation. Our Super Duplex Steel Equal Cross Pipe Fittings has excellent strength and wear resistance, along with good toughness, joined in the company of good ductility, and has the capability to defy stress at high temperatures.
