THREADED FLANGES

Jade Special Metals is one of the finest distinguished manufacturers and distributors of Threaded Flanges, which are stronger and harder as compared to normal steel. Further, these Stainless Steel Threaded Flanges are available in diverse specification to suit the different requirements of our prestigious clients and at affordable rates. Meanwhile, Carbon Steel Threaded Flanges has several features like having Light weight, Ruggedness, Rust proof, Durability and so on. However, these Super Duplex Steel Threaded Flanges are not as challenging to corrosion as stainless steel. Typical applications of Alloy Steel Threaded Flanges include a lot of components for the chemical dispensation, oil and gas, marine, food and pollution control industries. Low down carbon content of Inconel Alloy Threaded Flanges lowers the risk of carbide precipitation to a great extent at the granule limitations during heat action.
